Innovate, Collaborate and Elevate with AKA!

By joining AKA, you become a part of a community driven by innovation and a vision for a cleaner world, transforming global power utilization and increasing sustainability with cutting-edge technology.

WHO WE ARE

AKA Energy Systems (AKA) is a systems integrator that offers innovative energy solutions to various industries. With a team of electrical, mechanical, software, and automation engineers, we...

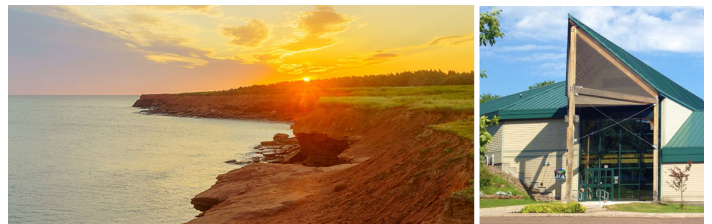

- **DEVELOP,**
- **BUILD,**
- **TEST,**
- **DEPLOY, and**
- **MAINTAIN**

Power systems in marine and offshore industries, microgrids and renewable energy technologies in land-based industries. We operate from offices located in Canada, the United States of America, Europe, and Asia, with teams deployed around the world. Engineering, Manufacturing, and Services are based primarily in our Prince Edward Island facilities.

We prioritize caring for one another, our communities, and the environment. Our goal is to create a significant and positive global impact through the development, advancement, and commercialization of technologies that enhance safety, promote environmental cleanliness, and improve overall well-being.

OUR COMMITMENT TO YOU

- Creative and challenging work environment immersed in cutting-edge technologies
- Working with experienced cross-functional teams in a globally renowned company
- Flexible working conditions and exciting travel opportunities
- Continuous training, and professional and personal development
- Opportunities to learn and work across a wide array of projects and engineering disciplines
- Competitive compensation package, including attractive group benefits.

Ahead of the Current. Local Presence. Global Reach.

FINANCIAL ANALYST

Employment: Full Time | Reports To: Financial Controller | Location: Poole's Corner, PEI

ABOUT THE ROLE

As part of the financial team, the Financial Analyst are responsible for tracking the company's financial performance against a plan, analyzing business performance and market conditions to create forecasts, and helping senior management make tactical and strategic decisions by providing periodic reports.

POSITION RESPONSIBILITIES

- Analyze financial and accounting data, identify trends, audit for discrepancies, and provide actionable insights to improve financial performance
- Ensure timely and accurate reconciliation of revenue and costs with GL accounts in accounting software
- Develop and maintain financial models and workflows, including ETL processes and automation techniques, to support decision-making and strategic planning
- Prepare and deliver monthly, quarterly, annual, and ad-hoc reports, including key metrics, financial results, and variance analysis
- Assist with monthly close processes, budgeting, and forecasting activities
- Provide analytical, forecasting, and project support to senior management and project teams to drive key business objectives
- Identify and implement process improvements in financial workflows, ensuring accounting software functions efficiently and accurately

- Collaborate with team members by assisting with journal entries, vendor bill and invoice postings, and other finance tasks as needed, depending on workload and team capacity
- Ensure compliance with financial guidelines, company policies, and relevant regulations

EDUCATION & EXPERIENCE

- A bachelor's degree in business, accounting, finance, or computer science; CFA, CPA or CMA designation is an asset
- A minimum of 5 years of experience in corporate finance, accounting, financial planning and analysis, or related fields

KNOWLEDGE & SKILLS

- Advanced proficiency in MS Excel, including formulas, data cleansing, data manipulation, and financial modelling: experience with Power Query M and Odoo is a strong asset
- Knowledge of MS Fabric and Power BI is an asset
- Knowledge and experience with accounting software and ERP systems are asset, particularly knowledge of Odoo or OpenERP

- Experience with database systems; familiarity with SQL or DAX is an asset
- Experience using Python for data manipulation, automation, and ETL processes is an asset
- Experience with financial planning software is an asset
- Excellent analytical, decision-making, and problem-solving skills
- High attention to detail and accuracy
- Strong communication and collaboration skills to work effectively in a team environment

COMMUNICATION

- Tailor communication (e.g., content, style and medium) to diverse audiences
- Communicate equally effectively at varied organizational levels
- Understand others' underlying needs, motivations, emotions or concerns and communicate effectively despite the sensitivity of the situation
